## ABOUT ME

I am a passionate and dedicated Software Engineering undergraduate at the University of Kelaniya, with a strong foundation in programming, web development, and problem-solving. I enjoy building real-world applications and continuously learning new technologies. I'm currently exploring areas like Spring Boot, React, and mobile development, and I'm eager to contribute to innovative projects while growing both technically and professionally.

## EDUCATION

**J/Hartley College**

2012-2020

High School

**University of Kelaniya**

2023-present

Undergraduate BSc hons in

software engineering

## PROJECTS

### Fuel Station management system

Technologies: Spring Boot, React.js, MySQL, JWT, Spring Security, HTML, CSS.

Developed a full-stack web application to manage fuel station operations efficiently. The system includes three user roles: Admin, Owner, and Customer, each with separate login and registration modules.

Key features:

- Role-based Authentication using JWT tokens and Spring Security
- Customer and Owner Registration with data validation
- Secure Login System for all user types
- Modern UI with a dark blue theme using HTML, CSS, and Bootstrap
- Designed RESTful APIs and implemented MySQL for backend data management
- Focused on clean, responsive UI/UX and backend scalability

### LPL Sports Organizer Web Application

Technologies: HTML, CSS, JavaScript

Designed and developed a web application to manage and organize Lanka Premier League (LPL) matches. The system allows users to add match details and view them in a structured table format.

Key features:

- User-friendly interface to add, view, and manage match details
- Responsive table displaying team names, match date, time, and venue
- Clean and modern layout
- Emphasized usability and accessibility for easy match organization
