- Sinhala (Native)
- English (intermediate)

REFERENCE

Available upon request

PROFILE

“Software Engineering student with expertise in Flutter, React, and backend technologies (Node.js, Spring Boot). Passionate about mobile and web development, problem-solving, and machine learning. Experienced in building scalable, user-friendly applications and always eager to learn new technologies.”

WORK EXPERIENCE

Freelance Project 2023 - PRESENT
Fitness Mobile App for a Gym

- Developed a Flutter app for gym members to book sessions, make payments, and manage their schedules.
- Integrated video calling, real-time chat, and to-do lists for a seamless user experience.
- Implemented secure online payments for memberships and training sessions.

Academic Project 2025 - JAN
Fuel Quota Management System – Pumper Mobile App

- Built a Flutter app for fuel station pumpers to scan QR codes and update fuel quotas.
- Integrated REST APIs for real-time fuel quota updates and transaction records.

Side Project 2024 - OCT
Face Recognizer with QR ID(Flutter with face SDK)

- Developed an offline face recognition system with face spoofing detection.
- Implemented QR ID-based user registration for a seamless onboarding process.

Other Projects

- Modern Farming Webapp with ReactJS
- E-learning platform for students and teachers(flutter + firebase)

EDUCATION

Bsc Honours in Software Engineering 2023 - 2027
University of kelaniya | 3rd year
